

JBK series machine tool control transformer

Application

JBK series machine tool control transformer are used for controlling power supply, local lighting and indicator lamp power supply of general electrical apparatus, such as kinds of machine tools and mechanical equipments and so on, in the circuit of AC 50~60Hz and input voltage 660V and below.

Main technical parameter

Rated capacity	40~2500VA	
Rated frequency	50~60Hz	
Primary voltage	220V, 380V	
Secondary voltage	Control	110V(127V)(220V)
	Illumination	24V(36V)(48V)
	Indicator signal	6V(12V)
